Key Questions

What is a password and why should we keep them safe?

A password is a secret word or phrase that allows a user to access a website. Passwords are like toothbrushes in that they should not be shared with anyone else.

Is everything I read on the Internet true?

Just because something is on the Internet doesn't mean that it is true. Some people create spoof websites that pretend to be something else such as a bank website or to provide misleading information.

How do I know if I am old enough to play a computer game?

Computer games, like films, are often not suitable for children. PEGI ratings will show how old a person must be to play a game.

Unit: 3.2

Online Safety

Key Vocabulary

Password

A secret word, phrase or combination of letters, numbers and symbols that must be used to gain admission to a site or application such as a website.

Blog

A regularly updated website or web page, typically one run by an individual or small group, that is written in an informal or conversational style.

Website

A set of related web pages located under a single name.

Internet

A global computer network providing a variety of information and communication facilities, consisting of interconnected networks and computers.

Concept map

A diagram that shows how different objects or ideas are related and connected.

Webpage

A page online that makes up one screen of a website.

Spoof website

A website that uses dishonest designs to trick users into thinking that it represents the truth.

Username

An identification used by a person with access to a computer, network, or online service.

PEGI rating

A rating that shows what age a game is suitable for.
